REGISTER - FAIL

REGISTER - FAIL - Before

- Before REGISTER
- Button is pressed -
- Highlights Redundant

REG - FAIL = Button - Pressed

- Background
- Foreground
- Repup.

- Back: Back to login
- Forgotten: Forgotten password

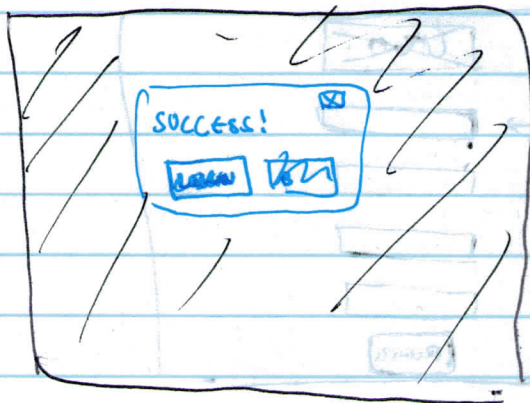

• If sent

- > Message "sent to email"
- & if correct email
- > Update database w/ input.
- > Change database.

- Assumes to be sent via email.
- > Actually just reset details

- If email correct + sent
sent to email registers

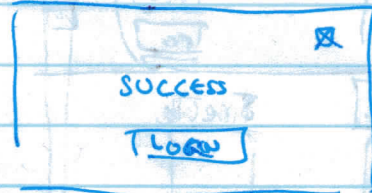

Register - Success!

Aesthetic

- Foreground centered
- Pop-up obvious

Popup

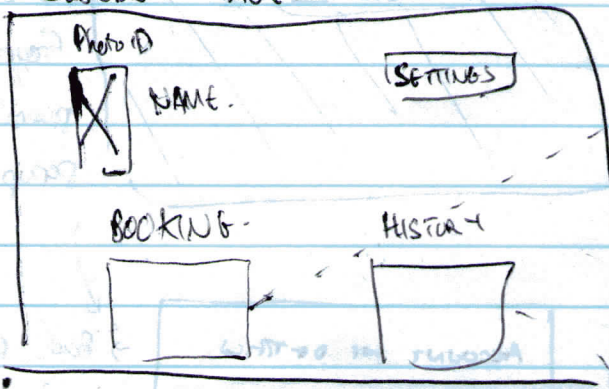

Functionalities

☒ → Back to front page

LOGIN → Takes it to customer page

Customer Page

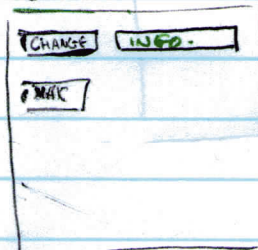

Aesthetic

Photo ID → use fake generator ones.

Bookings → should be basic list / w/ queries

Bookings

if booking booked
if no bookings

HISTORY

A list that contains =

DAY DATE TRAINER SERV

②.

Booking → FUNCTIONALITY.
→ MAKING

Assumptions

> no bookings made.

- Aesthetic

- Pop-up
- Background is dimmed.

Shape function

> Drop down boxes

Functionalities.

→ Per trainer

> they have specific service. (depend)

> w/ specific times.

→ If time is not booked, then they can press okay.

> If time is booked

> then they cannot press OK

> the time is booked out.

> It is grayer out

⊠ → Brings it back to customer screen

THINK

• Trainer - valid service - valid Time

> OKAY + Booked

• Trainer - valid service - invalid Time

> ~~Pop up~~ cannot be booked

> Time (invalid) cannot be pressed.

• Trainer - invalid service -

> cannot press on service they do not have.

IF OKAY:

BACKGROUND

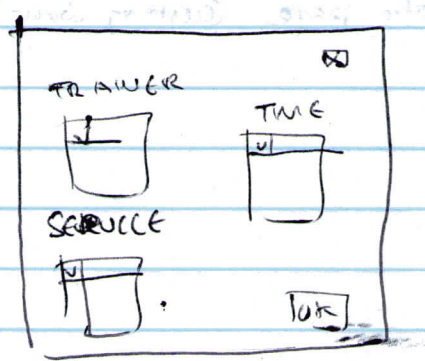

> adds booking to history.

FRONTEND

> Listed on page

> Button changes to 'change'.

Booking → functionality
 ↓
changing

Shape
 • Drop down boxes

Assumptions

- Booking made (screen is c/p page).
- Changing booking → wants to change everything (not singular)

Functionalities

• Same as booking made.
 // i.e., changing is just "make a booking" again

Backend

- > Updates particular backend w/ new booking
 i.e., change old history.
- > Updates button back to 'change'.

FRONT END FUNCTIONALITIES

>

Front Page - LOGIN

LOGIN → INCORRECT → red over / pop → please enter correct.
→ CORRECT → Go to specific page (customer, worker).
